

Activtablet

Prepare Your Interactive Lessons Anywhere.

Time conscious teachers tell us they prepare their lessons wherever they can, at home or in the staff room. Out Activtablet allows teachers to prepare their Activboard lessons away from the interactive whiteboard, and to simulate the its features for flipchart preparation. Teachers can also practice using the Activprimary or Activstudio out of the class and without disruption.

The Activtablet is an A5 sized mini-board which plugs directly into your PC. Portable, with its own Activpen, Activpanel is the ideal preparation companion.
