

## Microsoft Lync is Better with Blue Jeans

Many enterprises have Microsoft Lync deployments, and Blue Jeans offers the best solution for making Lync an interoperable and effective visual communication tool.

### Blue Jeans Lync Support

Blue Jeans Network is changing how people connect with co-workers, customers and partners through an interoperable, scalable, and cost-effective cloud-based video conferencing and collaboration service. By giving customers a choice of supported video endpoints, Blue Jeans provides an easy, cost-effective solution that enables users to collaborate from their desks, on the road, at home or in a conference room. With its Microsoft Lync support, Blue Jeans is further extending the benefit of an enterprise-quality, personalized communications experience that is more collaborative, engaging and accessible with lower costs and improved productivity.

### Unique in Interoperability

Blue Jeans Network is the first and only company that provides integration between Microsoft Lync, Web Browsers, Cisco Jabber, Room and Telepresence video systems, Google Video Chat and PSTN in enterprise and company-to-company environments with Microsoft® Lync™ Server 2010 / 2013, OCS 2007 R2 and Microsoft Office 365.
