

# VC365

## PROFESSIONAL CONFERENCING PLATFORM FOR PEOPLE, TEAMS AND BUSINESSES

Video meetings, audio calling, data sharing, streaming and recording, all from one simple, professional and interoperable solution.

VideoCloud 365 makes professional business communication simple. Teams can connect, communicate and collaborate securely, wherever they are, whenever they choose, in whatever way works best for them.

Dial & receive calls directly or choose to meet in a Virtual Meeting Room with any combination of Video Conferencing endpoints, Skype for Business, desktop, mobile, tablet, browser or audio callers.

Unlimited HD calling. 50 way meetings. Outlook scheduling. Directories & presence. Indepth reporting. High performance apps. Personalised domains. Streaming and recording. Essential tools for today's workforce.

VideoCloud 365 is built on a secure, global, resilient network, and includes enhanced security features such as firewall/NAT traversal. You can talk with confidence, knowing that your meetings are secure and encrypted.

# Tell me more...

Connect any device, inside or outside your company. Unlimited video minutes and **50 participants** in one meeting. Easily connect different video platforms, endpoints & audio conferencing, all in the same meeting.

Any-to-any video dialing

Share and view **presentations, spreadsheets, applications and web pages** with the rest of the meeting. Review, edit, blog or design with anybody, between the desktop, mobile and your meeting room.

Live screen-share

With **Outlook integration**, planning and scheduling meetings with your colleagues is quick and simple. Schedule meetings on the go from your phone or tablet, and automatically join in a single click.

Simplified scheduling

Unlimited audio-only dial-in for guests via traditional telephony or VoIP/ data telephone networks, with **55 international dial in numbers**. Plus audio + presentation mode enables audio only participants to still view content.

Unlimited audio-only dial-in

Indepth statistics from the **administrator dashboard**. Monitor call history, user statistics, add/remove users and manage passwords & PINs, and use reporting for ROI analysis and adoption.

Centralised management & reporting

Create and record amazing video events with hosts and participants in multiple locations, for audiences of any size. **Record & stream directly from your meeting spaces**, publicly or privately using RTMP or YouTube integration.

Recording & Streaming

For small organisations and single teams, to global companies looking to enable their entire organisation with high quality Video, Audio and Data communications in the cloud, VideoCloud 365 makes it possible.
