- **Enjoy beautiful products while you communicate with Red Dot-awarded designs.**

Cisco TelePresence MX Series

Better Communication Tools and a Competitive Edge

Give your employees and clients the ability to share and communicate more effectively over distances and across devices.

Turn any-size meeting space – from a small office to a large conference room – into a video collaboration hub.

Meet the growing need for real-time visual collaboration with high-quality video solutions that are easy to use, deploy, and scale.

The Cisco TelePresence® MX Series allows you to achieve all of these goals with a range of tools and options customizable to your needs and budget.

Figure 1. The MX300 (Left) and MX200 (Right) Are as Easy to Install as a Television and Priced for Large-Scale Deployments

Figure 2. Red Dot Award-Winning MX700 (Left) and MX800 (Right) Video Collaboration Hubs

The MX700 and MX800 video conferencing hubs offer dual screens and dual cameras for brilliant – and equal – display of both people and content.

“One of the first things you’ll notice with [the Cisco] TelePresence MX Series is the approachable design. We wanted people to walk into a room and say, ‘I want to use this.’ And that beauty goes all the way through the user experience.”

Snorre Kjesbu

VP/GM, Cisco Collaboration
Endpoint Technology Group

Innovation You Can See and Hear – Faster than Ever Before

Video collaboration is expanding across all industries, and Cisco has enhanced its industry-leading virtual meeting technology to help you stay ahead of the need within your business. The Cisco TelePresence MX Series helps ensure your business and your staff are connected, better organized, and more efficient. Both the **MX700 and MX800** and **MX200 and MX300** product lines provide:

- Fully integrated systems that deliver high-definition video and high-fidelity sound in a Red Dot-awarded industrial design for the most delightful user experience.
- Intelligent Proximity technology that enables attendees to instantly access meeting presentations on their tablet or smartphone – no matter when they arrive to the meeting; it also allows them to review shared content independent of the presenter. They can also wirelessly share content from their Mac or PC.
- Built-in conferencing (optional) so you can add multiple parties to your call without the need for an external multipoint control unit.
- Simplified setup and deployment capabilities that allow you to begin using the solutions faster than ever: You can place, plug in, connect, and make calls with the MX200 and MX300 within 10 minutes; this process with the MX700 and MX800 can be done in less than 2 hours.
- Plus other features, including the intuitive Cisco TelePresence Touch 10 user interface, flexible mounting options, and multistreaming* for optimal layout and content views; you can also add another screen for content sharing.

For those who need greater engagement, the **MX700 and MX800 systems provide an optional dual camera setup with speaker tracking capability**, which automatically changes camera shots to focus on active speakers anywhere in the room.

Impressive Video Collaboration Options for Any Business and Any Budget

With two product lines to choose from, Cisco gives you greater flexibility to deploy and scale video with the needs of your business, regardless of budget.

MX700 and MX800 Series Performance Line

- An all-in-one solution designed for medium to extra-large meeting rooms.
- Powerful top-mounted speaker system and subwoofer optimized for voice and multimedia.
- Industry-leading camera optics with 20x zoom and auto-focus.
- Allows for WebEx® enablement and can replace projectors for local presentations.
- Options include MX800 Single and MX800 Dual with one and two 70-inch screens, respectively, and MX700 with two 55-inch screens, as well as the ability to add 1 or two displays for up to three screens for content sharing.
- The industry's only room systems to support H.265, which provides the foundation for future bandwidth efficiencies.

MX200 and MX300 G2 Series Value Line

- Designed for small to medium meeting rooms with options for 42-inch and 55-inch LED screens.
- As easy to install as a television and priced for large-scale deployment.
- Flexible camera features pan, tilt, zoom to ensure optimal framing and video clarity; presets provide flexibility and viewing of meeting participants and white boards or other visuals.
