

## DATA SHEET

# Polycom® HD Voice™

## Over twice the clarity and fidelity for more productive voice communications

Polycom has once again redefined the standard for crystal-clear, natural voice communications with Polycom® HD Voice™ technology. Leveraging over 15 years of leadership in communications technology, Polycom HD Voice is revolutionizing voice communication and collaboration by bringing astounding high-fidelity to the telephone, creating a richer and more natural experience.

Polycom HD Voice delivers over twice the clarity of ordinary phone calls for life-like, vibrant conversations. It's like switching from AM radio to CD-quality audio. The difference is so astounding, you will never want to go back to regular phone calls.

This increased clarity enables much more natural conversations, which significantly boosts recognition and enhances productivity. It's like being in the same room with the other participants on the call. You can hear every word without repeating, which saves time and cuts down on misunderstandings. User satisfaction is also increased by reducing frustration during phone conversations.

As global business and remote collaboration continue to increase, the need for clear communications has become more critical than ever. Accents and cultural differences add to the challenges. The clarity delivered by Polycom HD Voice makes remote collaboration easier than ever, enabling geographically dispersed teams to communicate as effectively over the phone as they can in person.

### About Polycom

Polycom is the global leader in open standards-based unified communications and collaboration (UC&C) solutions for voice and video collaboration, trusted by more than 415,000 customers around the world. Polycom solutions are powered by the Polycom® RealPresence® Platform, comprehensive software infrastructure and rich APIs that interoperate with the broadest set of communication, business, mobile and cloud applications and devices to deliver secure face-to-face video collaboration in any environment.
